

Working Prototype Known Problems Report

Pupper

Joseph Castelan, Josh Long, Sri Boinapalli, Aaron Le, Chris Yeh

12/2/2017

Functions that do not work correctly:

- 1) It's possible to open the profile of the next dog before we see its image on the main page
 - a) Go to the main page. Dog A is displayed. Swipe so that the path traveled by your finger has a slope of 1. Dog B's profile opens. Leave the profile page. The main page now displays Dog B's image.
- 2) An extra dog gets loaded when swiping left to right after a certain number of right to left swipes
 - a) Go to the main page. You should see the placeholder dog. Swipe right to left three times. Swipe left to right three times. A different dog is there instead of the placeholder dog. Swipe left to right one more time in order to return to the placeholder dog
